PROFESSIONAL SUMMARY

Technical Product Manager with a track record of building AI-powered platforms from 0 to 1. Over the past year, shipped two products serving 200K+ users, an LLM-based hotel concierge (64% automation, ₹15L+ savings per client) and a career guidance platform deployed across schools in India. Excited to solve hard technical problems in roles where products create measurable impact.

PROFESSIONAL EXPERIENCE

Technical Product Manager | VirtueCloud

June 2024 – Present | India

Career Guidance & College Application Platform (SaaS)

- Ship 0 to 1 EdTech platform in 5 months; scale to thousands of students with 99%+ uptime using Node.js, DynamoDB, and Redis backend
- Design S3-based content delivery optimized for low-bandwidth schools, achieving sub-2s response times across government and private deployments
- Drive product roadmap collaborating with UX, marketing, and school administrators; translate stakeholder needs into engineering specs
- Build monitoring stack (Prometheus, Grafana, CloudWatch) reducing incident detection time by 60% and tracking user engagement metrics
- Enable daily zero-downtime deployments via GitHub Actions CI/CD and Docker, accelerating feature delivery velocity by 40%
- Generate significant revenue growth for clients through streamlined application workflows and scholarship discovery features

AI-Powered Hotel Concierge Platform (AI SaaS)

- Build and deploy LLM-based concierge serving multiple luxury hotels (~200K users/year); achieve 99% uptime and 64% automation of guest requests
- Manage cross-functional teams architecting AWS-native solution (Bedrock, Lambda, S3); design multi-tenant system supporting 12+ languages
- Lead AI/ML team developing custom RAG pipeline with 99%+ accuracy; implement prompt engineering reducing hallucinations for brand-safe responses
- Define product roadmap for multilingual support, safety filtering, and personalized workflows; present quarterly updates to C-suite and hotel clients
- Optimize AWS Bedrock costs through model selection and caching while maintaining performance SLAs; build real-time dashboards for team visibility
- Reduce operational costs by ₹15L+ per hotel annually, increase guest engagement by 150%, enable unified admin panel for multi-property management

TECHNICAL SKILLS

Product Management: Product Strategy & Road mapping, PRD Writing, User Story Development, Stakeholder Management, Cross-functional Team Leadership, Metrics Definition & Analysis, Feature Prioritization (RICE, ICE)

Backend & Infrastructure: Python, JavaScript, SQL, DynamoDB, Redis, PostgreSQL, MySQL, Microservices Architecture, RESTful API Design, Database Schema Design

Cloud & DevOps: AWS (Bedrock, S3, Lambda, CloudWatch, IAM, ECS, EKS), Docker, CI/CD (GitHub Actions), Monitoring (Prometheus, Grafana), Infrastructure as Code (Terraform), Multi-tenant Architecture

AI/ML & Data: RAG (Retrieval-Augmented Generation), Large Language Models (LLMs), AWS Bedrock, Prompt Engineering, AI System Design, Data Pipeline Architecture, Analytics & Metrics Tracking

Tools & Collaboration: Git, GitHub, Jira, Agile/Scrum Methodologies, Technical Documentation, Stakeholder Presentations, Dashboard Design

EDUCATION

Bachelor of Technology in Computer Science & Information Technology

Symbiosis University of Applied Sciences | CGPA: 8.91/10

- *Modules: Machine Learning and Soft Computing, Mobile Applications, Agile technologies, DBMS, Cloud Technologies, Coding with Java, JavaScript, UI/UX, Data Analytics.*
- *Achievements: President CODEC (University Coding Club), Event Manager, Active Basketball Team.*
